

# Dolgo Crabapple

Photo courtesy MN DOT

The Dolgo Crabapple prefers full sun, is not drought tolerant and does best in moist, well-drained soil.

It is fast growing and reaches heights of 35 to 40 feet.

It is One of the hardiest and earliest of the crabapples to bloom. Best all purpose, self-pollinating crabapple that is perfect for jelly and a good source of pectin for other fruit jellies. It is also fairly disease resistant.
